### **Expanding your Ability to Create the Results You Truly Want**

The demands of today's marketplace require us to learn new techniques & new skills to help us turn our goals & our vision into reality. In this informative and inspiring presentation, Bodine will share principles & techniques to help you boost your natural creative capacity, and increase your ability to create the results you want, in your work and in your life.

It's important to know how to inspire yourself in an authentic way, but inspiration without action is pointless. And action without the focus of an intelligent strategy can often be misguided. What we need is an achievement process that helps us focus our attention, generate leverage, develop strategy, and provide us with the energy for execution & follow-thru.

The good news is such a process exists. And, the people and companies using it have created very productive results for themselves. Inspired results.

21<sup>st</sup> Century Achievement Science

This is effective behavioral science, derived from studies of the most creatively productive people in business & the arts.
